**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

They are claiming that residential consumers (That is ME!!!) will not be affected, because there are no carriers (thats SONIC my internet provider since the 90's and still going strong and a great company that has real customer servie and works always to provide in the best intrests of the community) who use unbundled copper and inter-city fiber transport elements (UNEs) to compete in the residential marketplace.

Sonic, other carriers, and a full economic study all disagree with USTelecom on this key point.

So PLEASE don't make a decision based on lobby-ests intrests. Please think about the real people out in the world that use these services and are happy with their internet just the way it is.

Sonic is a local company to me, since they started out basically in my hometowns community college, but they have grown and grown. By always being a great company for customer service and for tech innovation. They put there \$\$ back into the communities they serve and into their business.

Please dont fall for Big Bussiness shenanagins, FCC is supposed to be above that.

Thanks so Much!!
